Faculty of Dentistry
Chulalongkorn University

Message from... the Dean

We are delighted to announce that our dental school has been ranked 70th in the world for its academic excellence in various subjects by QS World University Rankings by Subject 2023. This ranking evaluates more than 500 dental schools across the globe based on their research, education, and international reputation. This recognition is a testament to the hard work and dedication of our faculty, staff, and students from the past to the present, who have demonstrated exceptional academic excellence and contributed to the advancement of knowledge in their respective fields.

We are proud to be one of the top dental schools in the world and will continue to strive for excellence in education, research, and innovation. This achievement would not have been possible without the support of our alumni, partners, and stakeholders. We look forward to continued success and growth in the years to come.

Message from the Dean

ประวัติ

คณะทันตแพทยศาสุตร์ FACULTY OF DENT

Chulalongkorn University

นายแพทย์วาด ได้เข้าเฝ้าสมเด็จพระเจ้าพี่ยาเธอเจ้าฟ้ามหิดล อดุลยเดช กรมหลวงสงขลานครินทร์ที่เมืองบอสตัน พระองค์ ท่านทรงสนพระทัยไม่น้อย รับสั่งว่าบ้านเรามีโรคฟันมาก เรายัง ไม่ได้จัดการอะไรเป็นล่ำเป็นสัน ถ้านายแพทย์วาด จะกลับไปทำ แล้วจะประทานเงินส่วนพระองค์ ๑,๐๐๐,๐๐๐ บาทให้เริ่มต้น แต่ เป็นที่น่าเสียดายเพราะภายหลังเสด็จกลับไม่นาน ได้ประชวร และ ้สิ้นพระชนม์เมื่อวันที่ ๒๔ กันยายน พ.ศ.๒๔๗๒ จึงอาจกล่าวได้ ว่าพระองค์ท่านเป็นบุคคลแรกของประเทศไทยที่เห็นความสำคัญ ของวิชาทันต_์แพทยศาสตร์

พ.ศ. ๒๔๗๑ ถึง พ.ศ. ๒๔๘๒

พ.ศ.๒๔๗๑ นายแพทย์วาด แย้มประยูร ได้เสนอความคิดใน การก่อตั้งโรงเรียนทันตแพทย์ในประเทศไทย ต่อศาสตราจารย์ ้าอเจ เอลลิส คณบดีแพทยศาสตร์ แต่ไม่สำเร็จเนื่องจากงาด งบประมาณ ในปี พ.ศ. ๒๔๗๙ ได้ติดต่อกับ พ.อ.หลวงพิบูล สงคราม (จอมพล ป. พิบูลสงคราม) ซึ่งได้รับอนุมัติให้ดำเนิน การได้ โดยพระเจ้าวรวงศ์เธอพระองค์เจ้าจลจักรพงษ์ ได้ประทาน ้เงิน ๗,๐๐๐ บาท ให้สร้างตึกบำบัดโรคฟีนขึ้น ที่กองเสนารักษ์ ุมณฑลทหารบกที่ ๑ ต่อมาในปี พ.ศ. ๒๔๘๑ ทันตแพทย์สี สิริสิงห ได้เข้าเฝ้าสมเด็จ พระราชชนนีศรีสังวาลย์ กราบทูลขอ พระกรุณาให้ อูปถัมภ์โรงเรียนทันตแพทย์ที่จะจัดตั้งขึ้น และในปี พ.ศ.๒๔๘๒ พันเอกหลวงวาจวิทยาวัฒฑน์ ได้ร่วมปรึกษากับ นายสุกิจ นิมมานเหมินท์ เลขาธิการจุฬาลงกรณ์มหาวิทยาลัย เพื่อวางแผนจัดตั้งแผนกทันตแพทยศาสตร์ขึ้นในจุฬาลงกรณ์ มหาวิทยาลัย ด้วยความช่วยเหลืออย่างดียิ่งจากศาสตราจารย์ สุกิจ นิมมานเหมินท์ เลขาธิการจุฬาลงกรณ์มหาวิทยาลัย

พ.ศ. ๒๔๘๓

วันที่ ๑๖ พฤษภาคม พ.ศ. ๒๔๘๓ นายพลตรี หลวงพิบูล สงคราม อธิการบดีจุฬาลงกรณมหาวิทยาลัยได้ประกาศตั้ง แผนกทันตศาสตร์ เป็นแผนกอิสระ ในจฬาลงกรณมหาวิทยาลัย และตั้งให้นายพันเอกหลวงวาจวิทยาวัฑฒน์ ดำรงตำแหน่ง หัวหน้าแผนกทันตแพทยศาสตร์ ตั้งแต่บัดนั้นเป็นต้นไป พร้อมกันนั้นก็ได้เชิญ พ.ท.สี สิริสิงหมาเป็นอาจารย์พิเศษด้วย

Dr. Vach Yamprayoon (Luang Vach Vidyavaddhana) visited His Royal Highness Prince Mahidol in Boston. His Highness, who showed great interest in the dental health of the Thai people, and planned to donate one million baht of his own personal money to start the dental faculty. Unfortunately, His Majesty died on September 24th, 1929. It can be said that His Majesty was the first person in Thailand to see the importance of dentistry.

1928 to 1939

In 1928, Dr. Vach proposed the idea of establishing a dental school in Thailand to Prof. Aj Ellis, Dean of Medicine, but failed due to the lack of budget. In the year 1936, he was contacted by Col. Luang Phibunsongkhram (Marshal Plaek Phibunsongkhram), who approved his proposal. By Her Royal Highness Princess Chulalongkorn approved the sum of 7,000 baht for a dental treatment building to be built at the 1st Army County Sheriff's Division. Later in the year 1938, Dr. Sirisinha visited Her Royal Highness Princess Srinagarindra and asked that she would sponsor the dental school that was to be established. In the year 1939 Colonel Luang Vach Vidyavaddhana consulted with Mr. Sukich Nimmanheminda, Secretary-General of Chulalongkorn University, to help plan and establish the Department of Dentistry

1940

On May 16th, 1940, Major General Luang Phibunsongkhram, the President of Chulalongkorn University, announced the establishment of the Dentistry Department as an independent department in Chulalongkorn University, and appointed Colonel Luang Vach Vidyavaddhana to serve as the Head of the Department of Dentistry.Lt. Col. Si Sirisinha was invited to be a special teacher.

พ.ศ. ๒๔๘๕

จอมพล ป. พิบูลสงคราม นายกรัฐมนตรีมีคำสั่งให้โอนกิจการ ของจุฬาลงกรณ์มหาวิทยาลัยที่เกี่ยวกับสาธารณสุขได้แก่ คณะ แพทยศาสตร์และโรงพยาบาลศิริราช แผนกทันตแพทยศาสตร์ แผนกเกสัชกรรมศาสตร์ และแผนกสัตวแพทยศาสตร์ มาขึ้น กับกรมมหาวิทยาลัยแพทยศาสตร์ กระทรวงสาธารณสุข

พ.ศ. ๒๕๐๘

มหาวิทยาลัยแพทยศาสตร์ มีการปรับปรุงกิจการให้ดีขึ้น มาก จัดเป็นมหาวิทยาลัยที่สมบูรณ์ จึงทำการเปลี่ยนชื่อ เป็น มหาวิทยาลัยมหิดล คณะทันตแพทยศาสตร์ จึงสังกัด มหาวิทยาลัยมหิดล

พ.ศ. ๒๕១១

คณะทันตแพทยศาสตร์ มหาวิทยาลัยมหิดล ดำเนินกิจการได้ เจริญรุ่งเรื่องและเป็นที่ต้องการของประชาชนจำนวนมาก จึงได้ เปิดคณะทันตแพทยศาสตร์ คณะที่ ๒ โดยใช้ชื่อว่า คณะทันต แพทยศาสตร์ พญาไท มหาวิทยาลัยมหิดล

พ.ศ. ๒๕๑๕

คณะทันตแพทยศาสตร์ มหาวิทยาลัยมหิดล ถูกโอนย้ายกลับ มาสังกัดจุฬาลงกรณ์มหาวิทยาลัย เนื่องจากที่สถานที่ตั้งอยู่ที่ จุฬาลงกรณ์มหาวิทยาลัย และมีการเรียกนักศึกษาของคณะฯ ใหม่ว่า นิสิตคณะทันตแพทยศาสตร์ ส่วนคณะทันตแพทยศาสตร์ พญาไท คณะที่ ๒ ยังคงสังกัดมหาวิทยาลัยมหิดลตามเดิม ทำให้ ประเทศไทยมีคณะทันตแพทยศาสตร์ ๒ คณะเป็นต้นมา

1942

Field Marshal Plaek Phibunsongkhram ordered the transfer of Chulalongkorn University's affairs relating to public health, namely Faculty of Medicine and Siriraj Hospital Department of Dentistry, Pharmacy Department and the Department of Veterinary Medicine to be part of the Department of Medicine and the Ministry of Health

1965

University of Medicine made a lot of improvement and became a complete university, leading to the establishment being renamed the Mahidol University. The Faculty of Dentistry was then part of Mahidol University.

1968

Due to continuous success of Mahidol University's Faculty of Dentistry, a second faculty was established under the name of the Phayathai Faculty of Dentistry, Mahidol University.

1972

The Faculty of Dentistry was transferred back to Chulalongkorn University because the location was inside Chulalongkorn's property. The students of the new faculty were referred to as Nisit of the Faculty of Dentistry. The Phayathai branch of the Faculty of Dentistry remains under Mahidol University as before. As a result, Thailand has two faculties of dentistry at that time.

HISTORY OF THE FACULTY
Faculty of Dentistry,
Chulalongkorn University

Awards Received by the Faculty

World-Class University Rankings

The Faculty of Dentistry, Chulalongkorn University, received the Leading Institution for Tobacco-Free Society Award from the National Alliance for Tobacco Free Thailand, organized by the Dental Association of Thailand.

The Faculty of Dentistry, Chulalongkorn University, was ranked Global Top 70th university in the field of dental medicine in 2023 by the QS World University Rankings By Subject. This ranking involved an assessment of the faculty's performance in comparison to over 500 institutions worldwide, taking into account factors such as research output, educational quality, and international reputation.

The Faculty of Dentistry, Chulalongkorn University was honored with the 2021 Exemplary Institution Award for Rational Drug Use Education, awarded by the National Drug System Development Committee during their 1st/2022 meeting on February 9, 2022, held at the Ministry of Public Health in Nonthaburi.

Exemplary Institution Award for Rational Drug Use Education

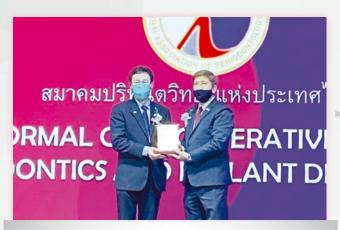

Certificate of Excellence for the Continuing Education Institution with the Highest Number of Activities

The Faculty of Dentistry, Chulalongkorn University, received a Certificate of Excellence for the continuing education institution with the highest number of activities among the top 5 institutions in Thailand. This recognition was awarded at the Dental Association of Thailand's 113th Meeting (1/2022) on June 9, 2022, at Centara Grand at CentralWorld Hotel.

Awards Received by Professors/Researchers

Dr. Sirima Sritangsirikul, Department of Pediatric Dentistry, received the 1st Prize Winner of the Asian Academy of Preventive Dentistry (AAPD) LION AWARD for her work on "Breastfeeding Duration and the Risk of Dental Caries: A Prospective Cohort Study." The award was presented at The 14th International Conference of Asian Academy of Preventive Dentistry (AAPD) held on October 1-2, 2021, in Daegu, South Korea.

Professor Emeritus Issara Yuktanand Award

Assoc. Prof. Suphot Tamsailom, Associate Dean for Academic Affairs, received the 2021 Professor Emeritus Issara Yuktanand Award for the Academic and Diagnostic Field at the 2021 Academic Conference and Annual General Meeting of the Thai Association of Periodontology. The event took place on December 2, 2021, at Bangkok Marriott Marquis Queen's Park Hotel, Bangkok.

Winner Research Category Award

Prof. Thanaphum Osathanon, Department of Anatomy, was awarded the Winner Research Category Award in the Regenerative Dentistry and Craniofacial Biology Category for his work on "Mechanical force regulates induced pluripotent stem cell behaviors."

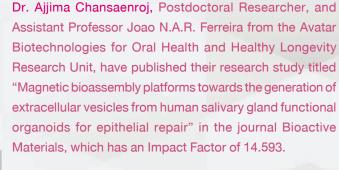

First Runner Up IADR

Dr. Pirawish Limlawan, a PhD student in the Graduate Program in Oral Biology and lecturer at Department of Oral Medicine, received the First Runner Up IADR Unilever Hatton Award - Senior Category for his research on "MicroRNA-302-3p delivery by surface-modified hydroxyapatite nanoparticle and 3D-printed TCP/HA scaffold promoted osteogenic differentiation."

Publication with an Impact Factor of 14.593

Our professors received the Outstanding Poster Award at the International Symposium for Interface Oral Health Sciences 2022, held online on January 15–16, 2022.

- Assoc. Prof. Chalida Limjeerajarus, Department of Periodontology, presented the poster titled "Iloprost promoted acellular cementum formation in ViVo" at the symposium.
- Assist. Prof. Wannakorn Sriarj, Department of Pediatric Dentistry, presented the poster titled "The SEM-EDX Analysis of Artificial Proximal Enamel Caries Adjacent to an Alkasite Restorative Material."

Our professor received an award from the Ratchadapisek Sompoch Endowment Fund, Chulalongkorn University for the year 2022.

• Research Unit (RU) Excellence Award: Assoc. Prof. Sutada Lotinun received the Research Unit (RU) Excellence Award for outstanding research achievements.

Prof. Thanaphum Osathanon, Associate Dean for Research Affairs, was selected as an Outstanding Dentist in the Academic Field (Next-Generation) by the Thai Dental Council for the 9th term (2019–2022).

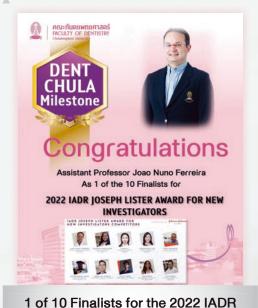

Outstanding Young Researcher Award

Assist. Prof. Nareudee Limpuangthip, Department of Prosthodontics, received the Outstanding Young Researcher Award in the field of Health Sciences.

Assist. Prof. Joao N.A.R. Ferreira was selected as one of the 10 finalists in the 2022 IADR Joseph Lister Award for New Investigators at the 2022 ADR/APR General Session & Exhibition.

of Oral Care Award 2022

The Innovation of Oral Care Award 2022

Assistant Professor Joao N.A.R. Ferreira a professor at the Faculty of Dentistry, Chulalongkorn University, received The Innovation of Oral Care Award 2022 from The International Association of Dental Research in collaboration with GlaxoSmithKline (GSK). The award was announced at the IADR General Session 2022, making him the first researcher from Southeast Asia to receive this award, and placing Thailand among the only three countries in Asia to receive this award since its establishment in 2004.

The T.M. Graber Outstanding Article Award

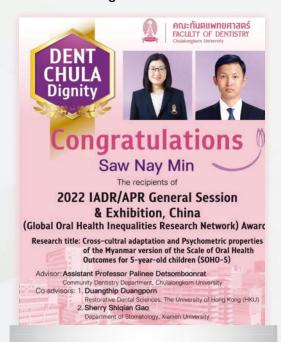

Assist. Prof. Pintu-On Chantarawaratit and Dr. Nantharat Apiwantanakul, professors at the Orthodontics Department, received The T.M. Graber Outstanding Article Award 2022 from the World Federation of Orthodontists for their research article titled "Cytotoxicity, genotoxicity, and cellular metal accumulation caused by professionally applied fluoride products in patients with fixed orthodontic appliances: A randomized clinical trial," published in the Journal of World Federation of Orthodontists, September 2021, Volume 10, Issue 3, Pages 98-104.

Joseph Lister Award

Awards Received by Students

Smile Train/ GOHIRN

Dr. Saw Nay Min, a Ph.D. student in Community Dentistry (International Program), received the Smile Train/GOHIRN (Global Oral Health Inequalities Research Network) award for his researchon "Cross-cultural adaptation and Psychometric properties of the Myanmar version of the scale of Oral Health Outcomes for 5-year-old children (SOHO-5)."The award was presented at the 2022 IADR/APR General Session & Exhibition in China.

Dr. Charinya Kanchanasevee, a Master's degree student in Geriatric Dentistry (International Program), received the Outstanding Research Award for Master's Degree Students for her thesis titled "The Prevalence and Characteristic Features of Edentulism in Thai Patients and Genetic Changes Associated with Edentulism in Thai Families." The award was given by the 2021 Ratchadapisek Sompoch Endowment Fund, Chulalongkorn University.

Dr. Narin Intarak, a postdoctoral researcher at the Genomics and Precision Dentistry Research Unit, Faculty of Dentistry, Chulalongkorn University, received the 1st prize for the Best Oral Presentation for Research at the international conference "The Beginning of Genomics Thailand." The event was organized by the Thai Society of Human Genetics and the Health Systems Research Institute on February 18, 2022.

Outstanding Poster Award

Ms. Ravipha Suwittayarak, a MSc student in Oral Biology Program, received the Outstanding Poster Award at the International Symposium for Interface Oral Health Science 2022, which was held online on January 15–16, 2022.

Awards Received by Students

Ratcha Raksakmanut, a Ph.D. student in Oral Biology, received the IADR Pediatric Oral Health Research Group (POHR) Young Investigator Award at the 2022 IADR/APR General Session & Exhibition.

Mr. Thamasorn Eamtanaporn, Mr. Thunnithi Lerdlityothin, and Mr. Suravit Kulsirorat won the 1st prize from the 2022 IADR-SEA Hatton Award in the Junior Category for their research "Osteogenesis Imperfecta: Alveolar Bone Cells Characteristics and Responses to Jagged-1"

Luang Vach Vidyavaddhana Award

Napat Techatassanasoontorn, a sixth-year dental student, received the Luang Vach Vidyavaddhana Award for the year 2022 from the Thai Dental Council at its113th Annual Academic Meeting, held on June 8-10, 2022 at the Centara Grand at CentralWorld Hotel.

Winner of The 7th Endo Star Case Competition

Dr. Chanakarn Sinsereekul, a Higher Graduate Diploma student in Endodontics, won the championship at The 7th Endo Star: Endodontic case competition 2022, organized by the Thai Endodontics Association. She presented a non-surgical root canal treatment case in Category 3, without surgical intervention, combined with orthograde root filling.

Honorable Mention Award

Our students received the Honorable Mention Award from The 18th International Scientific Conference of the Dental Faculty Consortium of Thailand (DFCT2021), organized by the Faculty of Dentistry, Chiang Mai University.

Mr. Masron Yuera, Mr. Ratchanon Chanpeng, and Mr. Win Suwannarat received the Honorable Mention Award for their research titled "Stress and Burnout of Undergraduate Dental Students in Chulalongkorn University during COVID-19 Pandemic."

Mr. Jiranat Jaroonvechatam and Mr. Pasut Chaiboon received the Honorable Mention Award for their research titled "Development and Psychometric Test of myRisk Caries Risk Assessment Application."

Miss Areeya Nattigon, Mr. Jirasit Jearapunnee, and Miss Onrawin Phongphet received the Honorable Mention Award for their research titled "Healthier and Delicious Cookies: Is It Possible?"

2021 research awards received by the Department of CE/RU/STAR:

CE/RU/STAR Center Award for the highest number of published articles per personnel.

Research awards received by the Faculty of Dentistry, Chulalongkorn University:

Preclinical Department Award for the highest number of published articles per faculty member

 \triangleright

Clinical Department Award for the highest number of published articles per faculty member.

Cross-Disciplinary Curriculum

The Faculty of Dentistry, Chulalongkorn University, in collaboration with the College of Public Health Sciences, Chulalongkorn University, has jointly initiated an academic collaboration to establish a cross-disciplinary curriculum for Doctor of Dental Surgery and Master of Public Health programs. This is the first initiative of its kind in Thailand, aimed at enhancing the knowledge and skills of dental graduates in healthcare management, as well as fostering collaboration in research on dental public health and related fields. This endeavor will be beneficial in addressing the country's public health challenges.

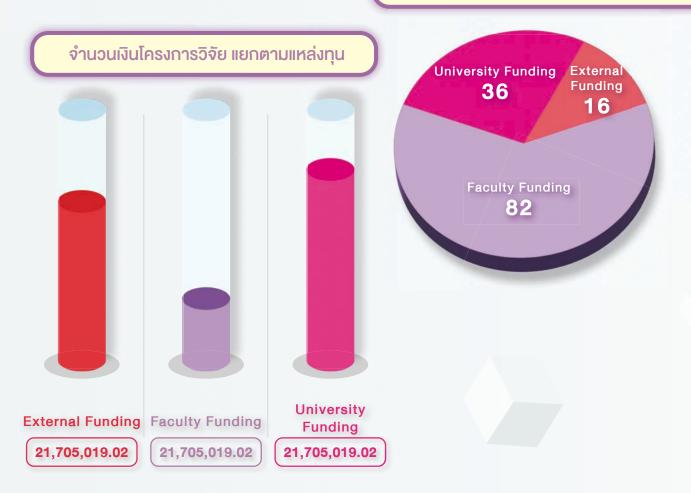

Research Results

In the fiscal year 2022, the faculty had a total of 134 research projects conducted by faculty members, funded from various sources, with a total budget of 60,094,194.02 Baht, as follows:

Funding source	Number of Projects	Amount (Baht)	Percentage
1. External Funding	16	21,705,019.02	36.12
2. Faculty Funding			
2.1 Professors Research Fund	49	6,343,075.00	10.56
2.2 Dental Research Fund	33	459,200.00	0.76
3. University Funding	36	31,586,900.00	52.56
Total	134	60,094,194.02	100.00

Number of Research Projects by Funding Source:

Orthodontic treatment stages: the children's hospital of Pittsburgh protocol and Naso-alveolar molding mechanics

Doctor of Dental Surgery (D.D.S.)

Number of Credits

231 credits

Objectives:

- To provide a solid foundation of professional knowledge necessary for general dental practice, including public oral health practice, research studies, continuing education, and self-learning in the future, as well as being professional and ethical.
- To develop basic professional skills in comprehensive patient care in line with changing trends, such as oral health promotion and disease prevention in the oral cavity, patient history taking, diagnosis, treatment planning, clinical therapy, and clinical operations based on patient information and scientific evidence.
- To possess skills in community and social engagement, including teamwork and management skills, considering physical, mental, social, and cultural differences at both individual and community levels.
- To foster continuous personal growth and self-development in terms of knowledge, skills, and attitudes as individuals with social values and abilities in information retrieval and management, keeping pace with rapidly evolving technologies and critical thinking.
- To cultivate a positive professional attitude, social responsibility, ethical conduct, and adherence to professional standards and codes of conduct.

- The curriculum ensures that teaching, learning, and assessment align with the professional competency standards of the Faculty of Dentistry, Chulalongkorn University and the Dental Council of Thailand.
- Professionalism, ethics, morality, and comprehensive patient care are integrated into the curriculum, emphasizing professional values throughout the program.
- The curriculum employs interactive teaching and learning methods, such as problem-based learning and case-based learning, to foster analytical thinking and continuous self-directed learning.
- The curriculum design varies across different academic years. Years 1-3 focus on problem-based learning, while clinical years emphasize case-based learning.
- The content of the curriculum is highly integrated and well-structured.
- There is a wide range of elective courses available to allow students to deepen their knowledge in specific areas of interest before graduation.
- The assessment of student performance and the curriculum align with the professional competencies defined by the Dental Council of Thailand and the desired attributes of Chulalongkorn University graduates.

Desired Attributes of Graduates

The desired attributes of graduates include proficiency in theoretical knowledge and its practical application, with skills in dental practice and a strong foundation in life sciences and health-related sciences as specified by the professional standards of dentistry. They should have the ability to seek and follow advancements in academic knowledge, technology, and societal changes to apply them effectively in dental practice, providing appropriate oral healthcare services to the public. Graduates should demonstrate potential for research and further education at an advanced level, with the capacity to contribute to the advancement of knowledge. Additionally, they should possess integrity, ethics, and morality, conducting themselves appropriately towards oneself, patients, and colleagues. They should be competent in adapting to changing professional contexts and delivering oral healthcare services in a manner that aligns with professional ethics. Finally, graduates should demonstrate a sense of responsibility towards society, adhering to professional codes of conduct.

Collaboration with other institutions includes:

Internal collaboration within Chulalongkorn University

such as other faculties that offer courses in general education (gen-ed) and elective subjects

Internal collaboration within Chulalongkorn University

- Ministry of Public Health, allowing students to undergo practical training in affiliated hospitals within Bangkok.
- Bangkok Metropolitan Administration (BMA), enabling students to engage in practical training at schools and healthcare centers.
- Ministry of Defense, providing opportunities for students to participate in practical training at affiliated military hospitals.
- Ministry of Education, allowing students to gain practical experience through training at affiliated schools.

Career Opportunities After Graduation

- Government Dentist / Civil Servant
- University Professor
- Dentist in Hospitals / Clinics
- Engaging in business related to the dental field

WHY THIS PROGRAM AT CHULA?

Chulalongkorn University held the first establishment of occlusion and orofacial pain program in Thailand, since 2002. We are recognized as a tertiary referral center for orofacial pain patient, especially TMD and masticatory dysfunction, from greater Bangkok and other parts of Thailand. This offers students the full experience of clinical evaluation and management of complex orofacial pain conditions and many interesting cases.

2 EXPERIENCE IN A MULTIDISCIPLINARY OROFACIAL PAIN CARE

The program provides in-depth knowledge of core treatment strategies for the management of 'pain' and 'masticatory dysfunction'. We designed the courses with a collaboration with other dental specialties, psychiatrist, neurologist, physiotherapist, pharmacists, acupuncturist, sleep specialist and more, to ensure that students receive the all-round view

OFFER A WIDE ARRAY OF RESEARCH MODELS

The occlusion and orofacial pain specialty involves several clinical problems such as masticatory function, pain pathophysiology, and clinical outcomes of pain treatment. Our staffs are experienced in diverse research fields with wide research connections. We offer the research topics in masticatory function, sleep dentistry, neuroscience, cell biology, orofacial pain management, pain epidemiology, and more. The program also builds a strong research background for those who want to pursue for a higher degree.

MASTER OF SCIENCE PROGRAM IN ESTHETIC RESTORATIVE AND IMPLANT DENTISTRY

INTERNATIONAL PROGRAM

YEARS

Master of Science (M.Sc.)

English

42 credits

Esthetic restorative and Implant dentistry are the two fields of interest for general practitioners. The esthetic restorative and implant dentistry is the advanced art and science of integration of several major fields in dentistry, i.e. operative dentistry, prosthodontics, periodontics, surgery, orthodontics and occlusion, involving systematic treatment planning to achieve highly successful treatment outcome leading to proper function of temporomuscular system, as well as improving and maintaining esthetic condition of the patient.

TUITION FEES

EDUCATION SERVICE FEE

First semester	385,000 Baht	
Second semester	385,000 Baht	
Summer semester	385,000 Baht	

GRADUATE TUITION FEE:

48,000 Baht / semester (4 semester)

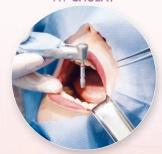

12,000 Baht / semester (2 semester)

Program partially supports registration fee and travelling expense for conference, field practice, some orthodontic equipments, etc Approximate cost per year as follows:

- Summer 385,000 BHT (11,000 USD, 1 USD = 35 BHT)
- Year 2 770,000 BHT (22,000 USD, 1 USD = 35 BHT)

Approximate total for Thai students or overseas students 2,310,000 Baht / person

WHY THIS PROGRAM AT CHULA?

Partnership

It's been agreed that nowadays esthetic restorative and implant dentistry are the two fields of interest for general practitioners. The esthetic restorative and implant dentistry is the advanced art and science of integration of several major fields in dentistry, i.e. operative dentistry, prosthodontics, periodontics, surgery, orthodontics and occlusion, involving systematic treatment planning to achieve highly successful treatment outcome leading to proper function of temporomuscular system, as well as improving and maintaining esthetic condition of the patient.

The program provides services, both by students and faculty members, to patients that would promote not only their oral and physical but also mental health. Atmosphere and environment suitable for international standard of teaching and learning also has been provided. The faculty has critically selected the location to establish the international clinic, and has provided high standard facilities to accommodate the program. The program contains highly qualified faculty members, as well as highly efficient supporting personnel to provide high-end impressive dental

WHY THIS PROGRAM AT CHULA?

PROGRAM OVERVIEW

Our program in Prosthodontics at Chulalongkorn University is one of the best programs in the country. This program prepares all post graduate students to become excellent in the field of prosthodontics research and patients' cares. Students will be familiarized with prosthodontics principles and advanced digital dentistry. Our program integrated biological knowledge to the prosthodontics mechanic to create biomimicry treatment concept.

This program offers the supportive learning experience in both conventional and digital dentistry. The didactic curriculum includes discussion of the classical articles and seminar in recent knowledge. We provide digital workflow from fixed restorations to complete dentures. Interdisciplinary treatment planning is encouraged in the program to provide the best standard of care for patients in the program. Students will be exposed to geriatric dentistry, maxillofacial prosthodontics and full mouth rehabilitation. We also present the positive 2-way learning experience for life-long learning goal.

WHY THIS PROGRAM AT CHULA?

Partnership

1 LEADER IN THE FIELD

Launched in 2016, the GSP (International Program) is an interdisciplinary program driven by the patients and their families' needs. The course details are designed and regularly updated by leading clinical experts in various fields. The program currently collaborates with the Faculty of Medicine, Chulalongkorn University and King Chulalongkorn Memorial Hospital.

Besides, for more holistic concern for the treatments, students also have a chance to learn from experts in other fields such as the Faculty of Architecture or the College of Population Studies.

2 MORE INTERNATIONAL EXPERIENCE

In optional, students would have an opportunity to experience the "home visit" programs and explore geriatric related research projects, as well as new innovations in dental and oral aspects at world class leading universities.

VARIOUS RESEARCH AREA TO CHOOSE FROM

different interests in research opportunities and knowledges through various course works from clinical study to public health, or microbiology and genetics.

WHY
THIS PROGRAM
AT CHULA?

Emphasis on producing highly knowledgeable and skilled pediatric dentists.

The program is taught by regular and special faculty members, as well as experts in each field who possess extensive knowledge and experience. These include experts in child psychology and behavior, linguistics, and dentists with experience in community preventive dentistry, such as chief dentists in multiple organizations and dentists in the Ministry of Public Health.

Potential for internationally recognized research.

he Faculty and the University provide support in terms of research funding, internationally standardized research facilities, and consultancy units to prepare and publish research works.

Graduates will gain diverse practical experiences through off-site internships at network hospitals.

These include training in special patient care and patients with systemic diseases at Ramathibodi Hospital and Chulalongkorn Hospital, as well as promoting maternal and child health at the Well Baby Clinic and clinics for children with special needs, through collaboration with Chulalongkorn Hospital.

WHY
THIS PROGRAM
AT CHULA?

1 International Program

This program is an international program that can accommodate both Thai and international students. It focuses on practical clinical training in the specialized field of pediatric dentistry.

Designed to Develop Students' Potential

The curriculum is designed to develop students' knowledge and expertise in the general care and special needs of pediatric patients. It aims to enhance their skills in providing comprehensive dental care to both typical and special needs children.

Readiness for Specialist Certification

Upon completion of the program, students are well-prepared to pursue specialist certification in pediatric dentistry. They are eligible to apply for the specialist certification examination from the Dental Council.

The program is flexible and can accommodate the potential and needs of each student. There is an adequate number of expert faculty members available to provide personalized attention and support to all students.

WHY THIS PROGRAM AT CHULA?

Research Achievements at National and International Levels

The department has a strong research culture, with faculty members excelling in various fields, including dental materials science and oral biology. They actively collaborate with professors from other disciplines, resulting in the continuous publication of research papers in both national

Standardized Clinics with Modern **Equipment and Materials**

The graduate clinic in operative dentistry is equipped with state-of-theart facilities and materials, including CAD/CAM technology. The program emphasizes the use of modern techniques and technologies in patient care. The clinic provides hands-on training in various aspects of operative dentistry, and you will have the opportunity to work with patients who require complex restorations, aesthetic dentistry procedures, and special care. Interdisciplinary collaboration is also encouraged.

Highly Qualified Faculty in both Clinical and Research Fields

The program boasts a faculty of highly qualified professors and experts in both clinical and research aspects. They hold doctoral degrees and have extensive expertise in operative dentistry, both nationally and internationally. As a student, you will have the opportunity to work in diverse clinical settings, ranging from complex restorations using various materials, $\,$ such as inlays, onlays, veneers, and full-mouth rehabilitation, to aesthetic dentistry procedures. The program focuses on comprehensive patient care.

Training and Development Opportunities

Apart from the core curriculum, the program supports extracurricular activities to enhance students' skills and competencies. These activities include advanced training in dental photography, CAD/CAM training, attendance at national and international conferences, and participation in societies and associations related to dentistry. Additionally, there are opportunities for community service and outreach activities both within and outside the university. These experiences contribute to the development of students' professional identities as competent and ethical dentists

WHY THIS PROGRAM AT CHULA?

Higher Graduate Diploma in Clinical Sciences in Oral Pathology at Faculty of Dentistry, Chulalongkorn University is a 3-year program designed to train prospective students to be proficient in practicing and teaching oral and maxillofacial pathology. Our academic staffs are distinguished board-certified oral and maxillofacial pathologists (Thai and American Board) and are leaders in the field of oral and maxillofacial pathology. This program is accredited by the Royal College of Dental Surgeons of Thailand and students who successfully complete the program will be eligible to sit for the Thai Board of Oral Diagnostic Science (Oral Pathology) examination.

The oral pathology graduate program offers strong didactic courses in all aspects of oral and maxillofacial pathology as well as clinical practice in surgical oral pathology laboratory service, oral medicine and oral and maxillofacial radiology clinics. Students will be trained to develop clinical thinking, academic presenting and teaching skills in a myriad of seminar courses. Students are also encouraged to develop their own research projects to acquire research experience and manuscript writing skills.

WHY THIS PROGRAM AT CHULA?

THAILAND'S FIRST OF ITS KIND

Chula's Ph.D. Program in Dental Public Health is the first of its kind in Thailand. The curriculum provides several schemes to fit the various needs of students, i.e. concentration on research or coursework and research. The program is also open for both bachelor's and master's degree holders.

BE AT THE FOREFRONT OF THE FIELD

In keeping with Chula's mission, our Ph.D. Program will help produce specialists in the field of dental public health to help lead the academic field and research as well as dental public healthcare. Our Ph.D. candidate has been awarded a scholarship from IADR conference. Moreover, our graduates can be the leaders in their organizations, both locally and internationally, to come up with research projects that would benefit society.

Tuition fees for the first and last semesters 48,000 baht per semester **Summer Tuition Rates** 12,000 baht per semester

WHY THIS PROGRAM AT CHULA?

Experienced and Proficient Faculty

The faculty members providing patient care and conducting research are highly experienced and skilled. They hold qualifications in periodontics and have obtained a degree or certificate in periodontology or completed a doctoral degree. The ratio of faculty members to students is appropriate at 1:1.5.

The Department of Periodontology is well-equipped to support students in their research endeavors. Faculty members with expertise in periodontics and implantology act as mentors and provide guidance. The department is equipped with modern facilities, including the specialized Periodontics and Implantology Research Center and the Oral Biology Research Center. This conducive environment has resulted in recognized and continuous publication of research papers in both national and international academic journals.

Students in the Periodontology program have the opportunity to plan and execute treatment for diverse cases, including surgical and non-surgical periodontal treatments, regenerative procedures, crown lengthening, and various surgical procedures related to implant dentistry, such as free gingival graft, ridge augmentation, sinus augmentation, and implant placement. The Periodontology Graduate Clinic is well-equipped with state-of-the-art tools and experienced dental assistants, ensuring smooth and efficient clinical practice for students.

Highlight:

Higher Graduate Diploma in Clinical Sciences Program in Endodontics is equivalent to the residency training program (the Royal College of Dental Surgeons of Thailand). Upon completion of the program, students will receive a certificate from Chulalongkorn University and will also be eligible to sit for the Thai Board of Endodontics examination to obtain a professional license. During the course of study, there will be simulated written and oral examinations to help students prepare for the professional qualification examination. These simulations are designed to assist students in their readiness for the upcoming examination and subsequent professional licensure.

WHY
THIS PROGRAM
AT CHULA?

- Sufficient and Competent Teaching Faculty: The program boasts a sufficient number of knowledgeable and skilled instructors. The teaching approach is student-centered, encouraging students to express their opinions and engage in critical analysis.
- Adequate and Modern Equipment: In the Endodontic Clinic, the program provides modern and essential equipment for root canal treatments, such as Dental Operating Microscopes, nine-chair units, ultrasonic devices, warm vertical compaction tools, and surgical instruments. A wide range of materials is also available for various procedures.
- 3 Diverse Patient Cases: Students receive hands-on training with diverse types of patients and gain additional practical experience in other hospitals.
- 4 Excellent Library and Wi-Fi System: The program offers an outstanding library with easy access to books, journals, and various research materials. The Wi-Fi system ensures convenient information retrieval.
- 5 Central Location: Situated in the heart of the city, the university is easily accessible by public transportation, including several train and bus routes. Additionally, the location provides proximity to shopping centers and restaurants, allowing students to unwind after their studies.

WHY
THIS PROGRAM
AT CHULA?

Excellent and Advanced Knowledge:

We believe that sustainable development and success start with a strong foundation of knowledge. Our program focuses on providing comprehensive fundamental knowledge, allowing students to explore and research various topics. This enables students to pursue higher-level knowledge, bridging the gap between basic and advanced knowledge, and making learning enjoyable and self-directed, even after graduation.

Students are trained to think analytically and critically in various dimensions through seminars, club journals, and real patient cases. The curriculum emphasizes hands-on training with real patients under close supervision from experienced professors. Moreover, additional surgical training is offered annually by senior professors.

The learning environment fosters a family-like atmosphere, encouraging students to ask questions, express opinions, and engage in extensive discussions on various topics. The Department of Oral and Maxillofacial Surgery has been offering this course for a long time, resulting in a large number of alumni working across the country and internationally. This creates a strong bond, making it feel like one big, supportive family.

WHY THIS PROGRAM AT CHULA?

Excellent Fundamental Knowledge and Advanced Learning

We believe that to achieve sustainable and successful development, it is essential to start with a strong foundation. Therefore, our program emphasizes providing students with comprehensive fundamental knowledge, enabling them to conduct research and explore various information. This allows students to pursue higher levels of knowledge, creating a seamless link between basic and advanced learning, fostering an enjoyable learning environment that encourages self-driven continuous learning even after graduation.

Our students receive training to develop analytical thinking in various dimensions through seminars, club journals, and real patient cases. The program emphasizes intensive hands-on training with real patients, closely supervised by dedicated instructors. Furthermore, we encourage additional surgical practice with the senior staff, organized annually.

Modern teaching methods utilize cutting-edge technology to broaden students' educational horizons. Students can choose to integrate technology into treatment planning, ensuring optimal and suitable patient care. Advanced technologies like Guided surgery, Navigation, and Virtual surgical planning are incorporated into the program.
