ACTIVE RECRUITMENT FOR INTERNATIONAL STUDENTS

Active recruitment is now open to all students from around the world who are interested in pursuing the advanced education at the Faculty of Dentistry, Chulalongkorn University. It is a good chance to submit your CV for a preliminary review of the applicant's qualifications. In addition, you might get the chance to be interviewed with the lecturers of your preferred program.

Moreover, Chulalongkorn University offers scholarship opportunities for potential candidates.

The procedure for grantee selection will take approximately two months to complete.

Faculty of Dentistry Chulalongkorn University

Our School:
Faculty of Dentistry,
Chulalongkorn University

1926

Dr. Vach Yamprayoon (Luang Vach Vidyavaddhana) visited His Royal Highness Prince Mahidol in Boston. His Highness, who showed great interest in the dental health of the Thai people, and planned to donate one million baht of his own personal money to start the dental faculty. Unfortunately, His Majesty died on September 24th, 1929. It can be said that His Majesty was the first person in Thailand to see the importance of dentistry.

1928

to

1939

In 1928, Dr. Vach proposed the idea of establishing a dental school in Thailand to Prof. Aj Ellis, Dean of Medicine, but failed due to the lack of budget. In the year 1936, he was contacted by Col. Luang Phibunsongkhram (Marshal Plaek Phibunsongkhram), who approved his proposal. By Her Royal Highness Princess Chulalongkorn approved the sum of 7,000 baht for a dental treatment building to be built at the 1st Army County Sheriff's Division. Later in the year 1938, Dr.Sirisinha visited Her Royal Highness Princess Srinagarindra and asked that she would sponsor the dental school that was to be established. In the year 1939 Colonel Luang Vach Vidyavaddhana consulted with Mr. Sukich Nimmanheminda, Secretary-General of Chulalongkorn University, to help plan and establish the Department of Dentistry

1940

On May 16th, 1940, Major General Luang Phibunsongkhram, the President of Chulalongkorn University, announced the establishment of the Dentistry Department as an independent department in Chulalongkorn University, and appointed Colonel Luang Vach Vidyavaddhana to serve as the Head of the Department of Dentistry. Lt. Col. Si Sirisinha was invited to be a special teacher.

1942

Field Marshal Plaek Phibunsongkhram ordered the transfer of Chulalongkorn University's affairs relating to public health, namely Faculty of Medicine and Siriraj Hospital Department of Dentistry, Pharmacy Department and the Department of Veterinary Medicine to be part of the Department of Medicine and the Ministry of Health

1965

University of Medicine made a lot of improvement and became a complete university, leading to the establishment being renamed the Mahidol University. The Faculty of Dentistry was then part of Mahidol University.

1968

Due to continuous success of Mahidol University's Faculty of Dentistry, a second faculty was established under the name of the Phayathai Faculty of Dentistry, Mahidol University.

1972

The Faculty of Dentistry was transferred back to Chulalongkorn University because the location was inside Chulalongkorn's property. The students of the new faculty were referred to as Nisit of the Faculty of Dentistry. The Phayathai branch of the Faculty of Dentistry remains under Mahidol University as before. As a result, Thailand has two faculties of dentistry at that time.

GRADUATE PROGRAMS

• Doctor of Philosophy Program

Oral and Craniofacial Sciences
(International Program)
(Double Degree Program Chulalongkorn
University-Tohoku University, Japan)

Period of study : 3 - 4 years

THAI LANGUAGE AND CULTURE PROGRAM FOR INTERNATIONAL STUDENTS

Faculty of Dentistry, Chulalongkorn University

Learn Thai language with the instructors from
Chulalongkorn University Language Institute:
20 hours: 2 hours/week

The Thai Language and Culture Program for International Students is designed to introduce course participants to Thai language and culture. The program covers vocabulary, simple sentence structures, everyday conversations, Thai for dental clinic and various aspects of Thai culture. Moreover, the program includes cultural activities such as a tie-dye workshop and a field trip to Wat Arun, these activities offered students a unique hands-on experience and a deeper connection with Thai traditions. The medium of instruction is in both Thai and English.
